System description HMI

Structure and Concept

The VIPA professional Touch Panels with 4,3“ to 12,1“ TFT display, the Windows Embedded CE 6.0 operating system, and the Movicon 11 visualization system can be used universally.

The VIPA eco Panels in four different display sizes from 4,3“ to 15“ are characterized by absolute reliability and flexibility and also special longevity and quality because of the special construction.

The VIPA panel PCs in the display sizes 15,6“ und 21,5“ are a combination of industrial PC with the most modern features and a Touch Panel with optimum display possibilities. The latest Intel Atom Processor technology combined with Windows Embedded Compact 7 or Standard 7 operating systems correspond to state of the art in the PC world.

The VIPA Commander Compact CC 03 with double spaced display and integrated PLC CPU is the ideal device for smaller controlling and operating tasks.

The VIPA Operator Panel OP 03 and the Text Display TD 03 are universal operating units for deployment with VIPA systems and other control systems with MPI interface.

Performance and deployment

VIPA operating and monitoring devices are universal in the manufacturing and process industry, but can also be used in building automation. The line displays and touch panels are designed both for watching and for active operation of machinery, plant and building.

Parameterization and programming

The Text Display TD 03 are parameterized with the free Tool TD Wizard *) . The Operator Panel OP 03 and the Commander Compact CC 03 devices are configured with the OP Manager or alternatively with Siemens ProTool. The PLC CPUs, integrated in Commander Compact CC 03, are programmed in addition via VIPA WinPLC7 or Siemens STEP7. The basis for the Touch Panels is Windows Embedded CE operating system from Microsoft. Here the applications and visualizations offered by VIPA (also partially their own) are ported. VIPA Touch Panels are shipped with pre-installed operating system and Movicon. The project, created with the appropriate editor on the PC, is transferred via data cable or memory card from the PC to the Touch Panel.

Memory

The Text Display TD 03 has no built-in memory. The messages, generated with TD-Wizard, are stored in the CPU. The Operator Panel OP 03 make 256 kByte and the Commander Compact CC 03 devices 128 kByte work memory available for projects. Incorporated in the Commander Compact CC 03 devices is an additional 16/24/32 kByte work memory for the PLC program. The touch panels offer up to 2048 MB of user memory (depending on the model). External expansion of the memory can easily be achieved by inserting a CF or MMC-/SD-Card.

Functions

Depending on the device type different and very versatile functions are realizable. The Text Display TD 03 is provided primarily for the simple presentation and the acknowledgement of messages. With the Operator Panels OP 03 advanced operating and monitoring tasks are already being realized with their own projects deposited in OP 03. Touch panels have multi-functional use. Depending on the application projects with up to several thousand variables will be realized on the PC. Thereby CPUs, higher-level systems and other devices are connected for the purpose of data collection, data sharing, visualization and operation.

Communication

The exchange of data with the CPUs occurs at TD 03 and OP 03 via MPI. The Commander Compact CC 03 devices combine display and operating elements as well as PLC CPU with I/O peripherals in one casing. They can thus be used completely self-contained.

*) Downloadable on the tool Demo-CD SW900T0LA or under <http://www.vipa.com/en/service-support/downloads/software/>.

Lines displays

Structure and Function

Line displays are used for the operation and monitoring of process parameters in machinery, plant and buildings.

TD 03 – Text Display

The compact VIPA Text Display TD 03 shows via a backlit LCD display defined message texts. Inputs and outputs, and process parameters can be set through the membrane keys and changed. The configuration of the messages and the parameter block is performed using the TD-Wizard from VIPA. The menu can be selected in English and German. The text display is designed for use in combination with VIPA CPUs 11x, 21x, 31x, 51x and the S7-300/400 CPUs designed by Siemens.

OP 03 – Operator Panel

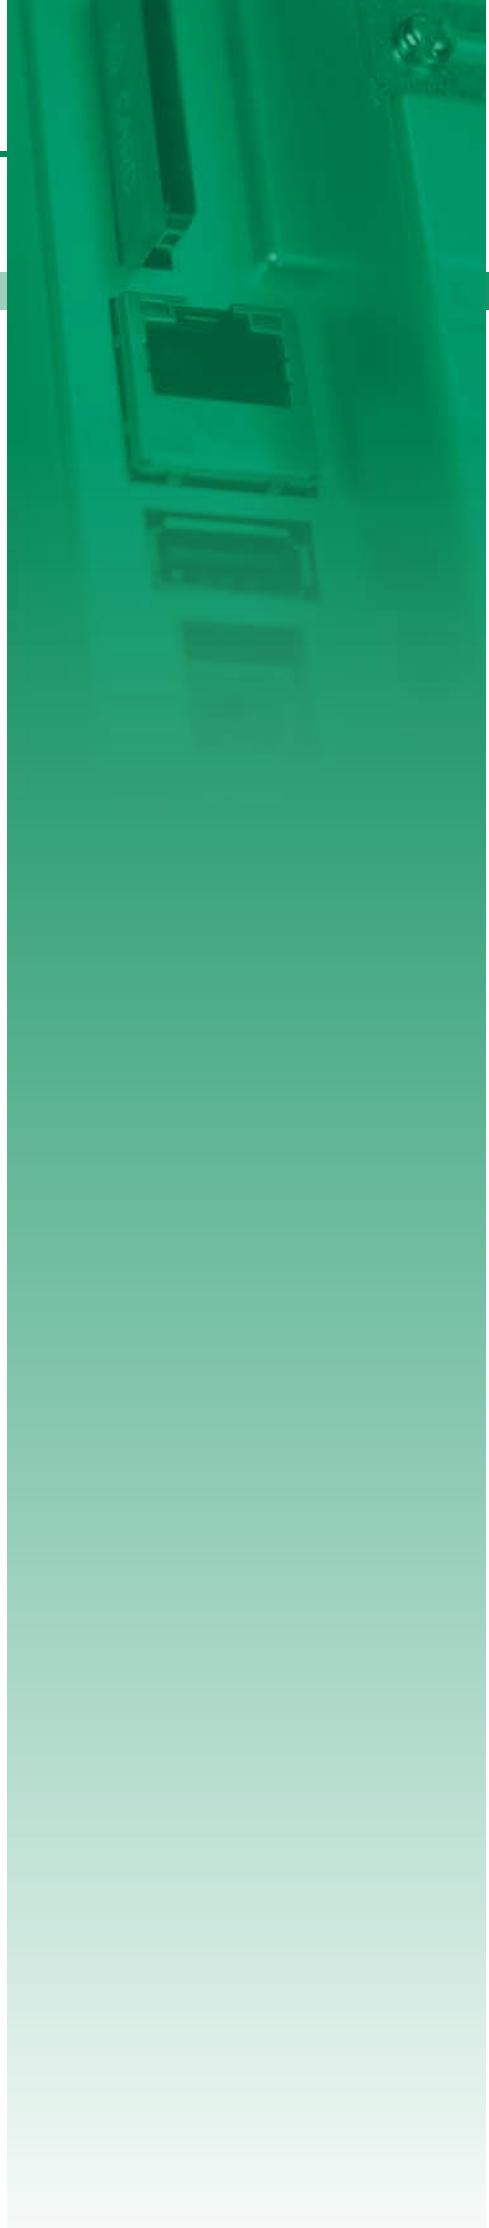

The VIPA Operator Panel OP 03 is particularly suitable for operating and monitoring of small applications in conjunction with VIPA CPUs 11x, 21x, 31x, 51x and Siemens S7-300/400 CPUs. Up to seven OPs can be connected to a CPU and up to 2 CPUs to an OP 03 via the MPI interface. For managing and processing operating notifications and data, 256 kByte user memory is available. Project planning is carried out with VIPA OP-Manager or Siemens ProTool.

CC 03 – Commander Compact

In the VIPA Commander Compact CC 03 a PLC CPU, programmable with Siemens STEP7, is integrated. Besides the 128 kByte user memory, the CPU has 16/24/32 kByte program and 24/32/40 kByte load memory (depending on version). In addition, 16 digital inputs and outputs each are integrated. The CC 03 is expandable with up to four 100V or 200V modules (160 digital inputs/outputs, or up to 32 analog inputs/outputs respectively are supported).

Characteristics

- ▷ Backlit LC-Display
- ▷ Parameterization capable function keys
- ▷ MPI-interface
- ▷ Multilingual Language Support
- ▷ Operation and project planning friendly
- ▷ LED-status indicator (CC 03)
- ▷ Compact design

Structure and Function

The VIPA Touch Panel family is suited for all applications in the factory, process and building automation. Due to the aluminum die-cast housing the VIPA Touch Panels are mechanically particularly robust. With the front-side IP65 protection, these devices also survive in harsh industrial environments.

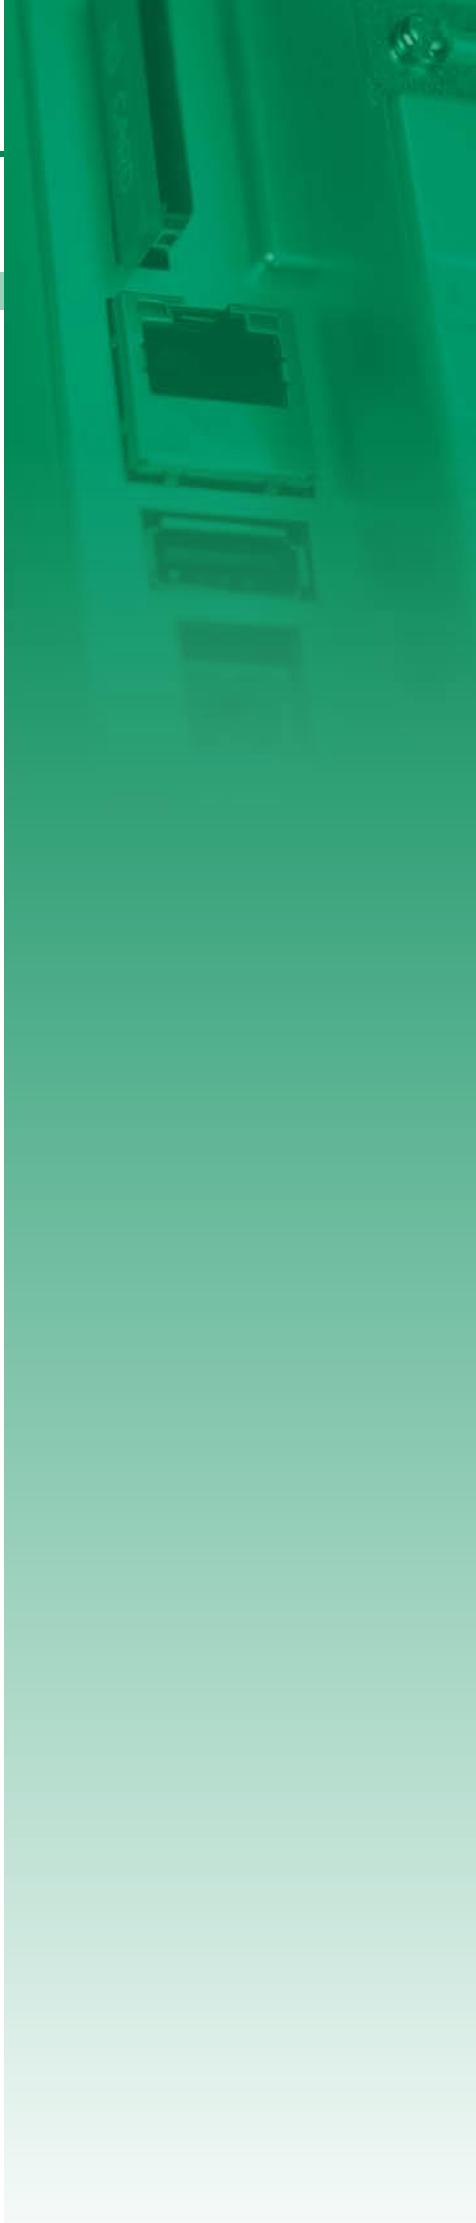

The portfolio ranges from 5.7" TFT up to 12.1" TFT color display. The compact design allows the use of VIPA Touch Panels also in confined spaces. The panels can be operated either horizontally or vertically.

Features:

- Display size: 5,7" up to 12,1"
- Type of display: TFT color
- Processor: XScale 800 MHz
- Interfaces: RS232, RS485, RS422, MPI, PROFIBUS-DP slave, Ethernet RJ45, USB-A, USB-B (depending on type of panel)
- Memory: already integrated, also with SD, MMC and0 CF card expandable
- Including VIPA PLCTOOL: (allows upload/download of programmes from VIPA- and STEP7 based controls, reading of the diagnosis buffer, as well as start and stop of the connected CPUs without using a programming unit)
- Including the operating system Windows Embedded CE 6.0 Professional and the visualization system Movicon

Visualization system Movicon:

- Editor for vector graphics with powerful and attractive library of characters
- Extensive I/O driver library (import of variables from the PLC possible)
- Powerful alarm management
- Multilingual support
- Interference and operation data acquisition including evaluation possibility
- Archiving of process data with trend curves
- Extensive driver library
- Scalability of the project of basic systems to Movicon Scada platform
- Multilingual support
- Save and extensive user management
- Remote management for projecting and remote maintenance
- Remote access via standard VNC client possible
- Integrated Ethernet TCP/IP networking
- Integrated AWL logic (STEP5/STEP7)
- Also deployable in combination with many controllers of different manufacturers

eco Panels

Structure and Function

The new ecoPanels enable completely new and attractive possibilities for mechanical and system engineers: efficient visualization at attractive prices: Manifold application possibilities. The ecoPanel series are not only distinguished by uncompromising reliability and performance, but impressive by an unsurpassed price-performance ratio. Of course, we also paid attention to durability and quality of the products. This is achieved amongst others by a special construction, which enables a fanless and disc free operation. This means there are no moving parts inside the unit.

The VIPA ecoPanels in combination with Movicon Basic (full-valued + unlimited Basic license) offers incomparable advantages. The software concentrates the powerful Movicon technology in a simplified form into an extremely user friendly editing environment. This enables a high scalability and a considerable increase in performance for every project.

Characteristics

- Display size: 4,3", 7", 10", 15"
- Type of display: TFT Color
- Processor: ARM11 533MHz+ / Cortex-A8 1000MHz
- Interfaces: RS232, RS485, RS422, MPI, PROFIBUS-DP slave, Ethernet RJ45, USB-A, USB-B (depending on type of panel)
- Memory: already integrated, also with SD and USB-Stick expandable
- Including VIPA PLCTOOL: (allows upload/download of programmes from VIPA- and Step7 based controls, reading of the diagnosis buffer, as well as start and stop of the connected CPUs without using a programming unit)
- Including of the operating system Windows Embedded CE 6.0 Core and visualization system Movicon BASIC

Visualization system Movicon:

- Editor for vector graphics with powerful and attractive library of characters
- Extensive I/O driver library (import of variables from the PLC possible)
- Powerful alarm management
- Interference and operation data acquisition including evaluation possibility
- Archiving of process data with trend curves
- Extensive driver library
- Scalability of the project of basic systems to Movicon Scada platform
- Multilingual support
- Save and extensive user management
- Remote management for projecting and remote maintenance
- Remote access via standard VNC client possible
- Integrated Ethernet TCP/IP networking
- Integrated AWL logic (STEP5/STEP7)
- Also deployable in combination with many controllers of different manufacturers

Panel PC

Structure and concept

The combination of industrial PC with state of the art performance features and a Touch Panel with ideal display capabilities enables the user to concentrate high performance into the smallest space. The latest Intel Atom processor technology, large integrated work memory and display resolutions of up to Full HD with the 21.5" panel PC are state of the art. The panels have also numerous useful interfaces just like other VIPA Touch Panels. The pre-installed operating systems Windows Embedded Compact 7 or Windows Embedded Standard 7 are state of the art in the PC world. For visualization your own programs or optionally the latest pre-installed Movicon visualization can be chosen.

Features

- Display size: 15,6" wide (16:9) und 21,5" wide (16:9)
- Display resolution: 1366x768 (15,6") und 1920x1080 (21,5")
- Display type: PCAP, Multitouch
- Housing: metal
- Processor: Intel Atom D2550 dualcore@1,86 GHz
- Interfaces: 2x Ethernet (10/100/1000), 4x USB 2.0, 2x serial (RS232,RS422/RS485), Audio out
- Memory: work memory 2GB
- Operating system and user memory: 8GB mit WES7, 2GB mit WEC7
- Memory card slot: CFast
- Operating system: Windows Embedded Compact 7 oder Windows Embedded Standard 7
- Visualization: optional Movicon 11 CE Standard pre-installed

Visualization system Movicon

- Vector graphics editor with powerful and clear symbol library
- Comprehensive I/O driver library (variables import from the PLC possible)
- Efficient alarm management
- Multi-lingual language support
- Disturbance and operating data acquisition
- Archiving process data with trend curves
- Comprehensive driver library
- Project scalability of Movicon basic systems to Movicon SCADA platform
- Secure and comprehensive user management
- Remote management for project planning and remote maintenance
- Remote access via standard VCN client possible
- Integrated Ethernet TCP/IP networking
- Integrated IL logic (STEP5/STEP7)
- Also deployable, of course, in combination with many controllers of other producers

HMI software

Structure and Function

The touch panel software and tools extend the capabilities of both the operating system as well as the visualization of Movicon and thus also the application possibilities of the touch panel.

Operating System

The VIPA Touch Panels are supplied together with the operating system Windows embedded CE 6.0. These worldwide-distributed operating systems guarantee a high degree of availability, flexibility and expandability.

Movicon-Runtime

The runtime version of Movicon provides VBA support, include a graphic interface, an extensive symbol and driver library as well as an automatic reconnect and data synchronization. In addition, various function libraries are available, such as the integration of intelligent peripherals and communication modules.

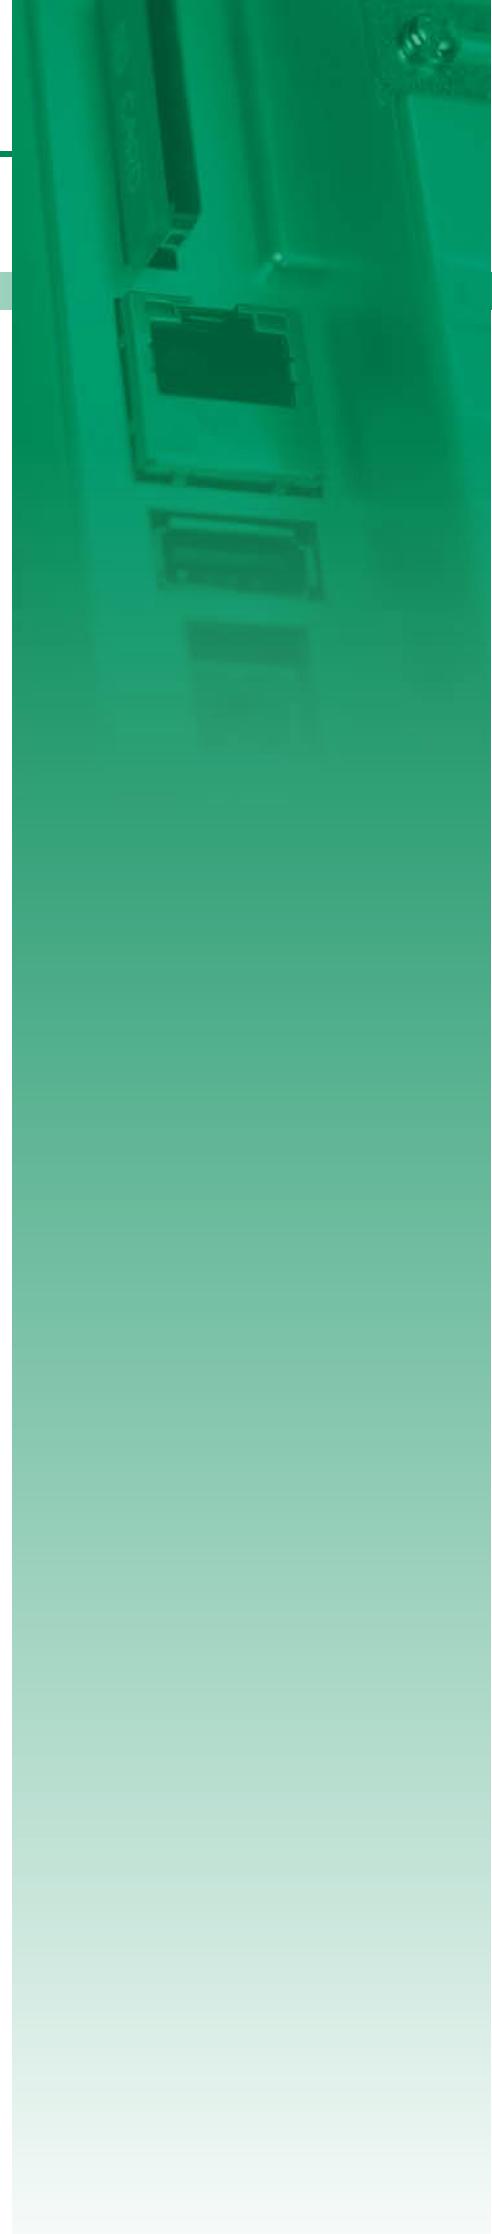

The use of the preinstalled runtime version of Movicon facilitate the immediate release of visualization projects.

Movicon-Editors

Movicon is a HMI/SCADA platforms with an open and flexible architecture for industrial automation, which allows the user vertical applications for visualization, data acquisition, logging as well as maintenance quickly and easily. Movicon with its graphically-intuitive interface and many integrated tools is easy to use for the operator.

Characteristics

- Java™ support
- Upgrade option to newer runtime versions
- Expansion of the existing run-time functionality
- Web server support
- Enlargement of the trend and archive server function

HMI accessories

Structure and Function

System accessories enable and expand the use of the system and facilitate starting.

Memory Expansion

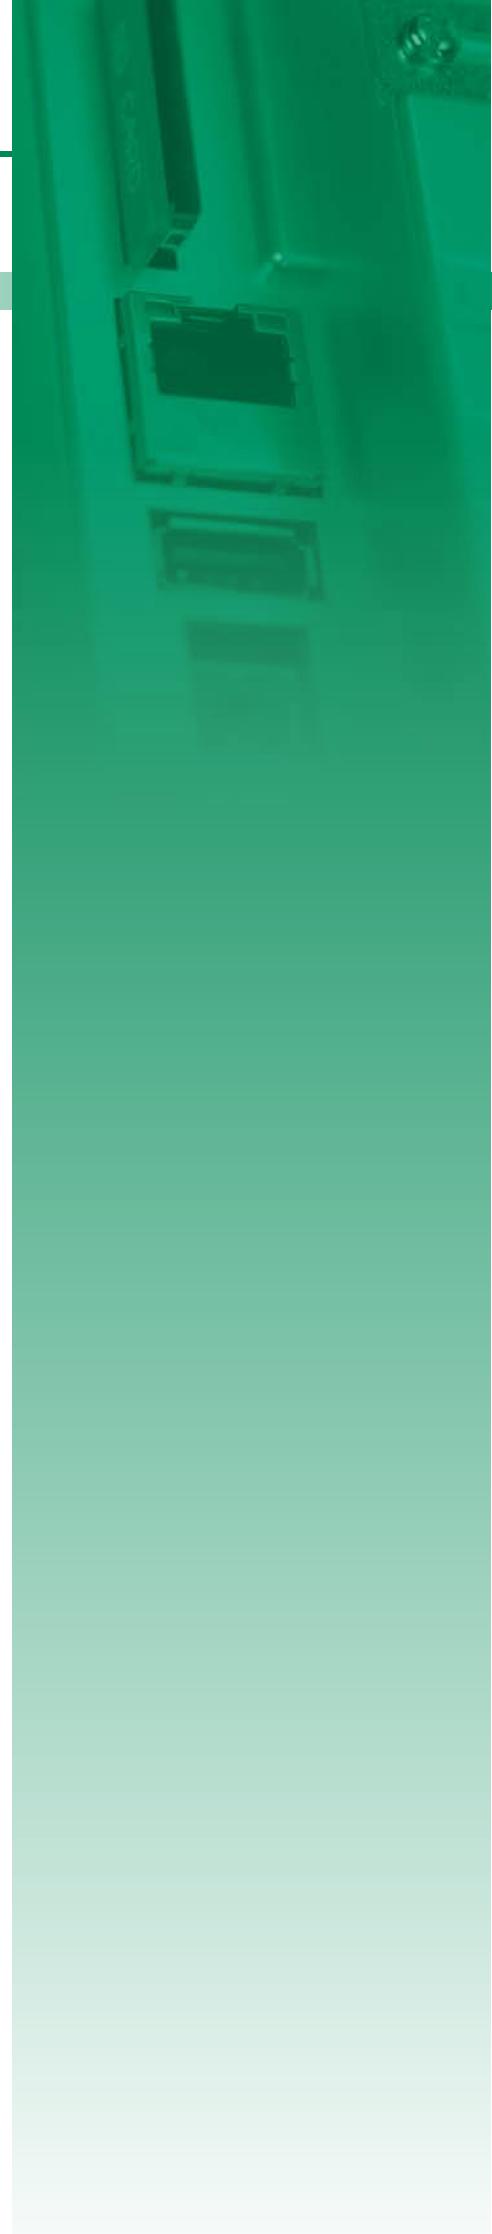

Standard Memory Type Compact Flash (CF) or Secure Disk (SD) can be used to expand the internal memory.

Cables

Accessories, such as USB and Ethernet programming cables, OP/AG cables with diagnostic connector or peripheral extension cables, as well as an extensive number of different protective films, support the versatile use of the systems.

Manuals

The technical documentation of the respective modules encompasses various manuals with the necessary hardware and programming information, detailed descriptions of each module, and instructions for structure and assembly.

Memory modules for Touch Panels

Order number	Type	Description	Note
574-2AH00	Compact Flash (CF) 1GByte	for VIPA professional Panels	
574-2AI00	Compact Flash (CF) 2GByte	for VIPA professional Panels	
953-1SI00	Secure Disc (SD) 2GByte	for VIPA eco and professional Panels	

Protective foil

Order number	Type	Description	Note
574-1AE01	Protective foil TP606	for professional Panels 6.5", 10 pieces	
574-1AF01	Protective foil TP608	for professional Panels 8.4", 10 pieces	
574-1AG01	Protective foil TP610	for professional Panels 10.4", 10 pieces	
574-1AH10	Protective foil TP612	for professional Panels 12.1", 10 pieces	
574-1BS01	Protective foil TP605	for professional Panels 5.7", 10 pieces	
574-1BC01	Protective foil TP605	for professional Panels 5.7", 10 pieces	

Cables

Order number	Type	Description	Note
670-0KB20	Ethernet programming cable	for Touch Panels with Movicon 3.0 m	
670-0KB00	OP/AG cable 0°/90° with PU/Diagnostic port	for VIPA CC 03, OP 03, TD 03	
670-0KB01	OP/AG cable 90°/90° with PU/Diag-nostic port	PU-/Diagnostic port, 2.5 m	
660-0KB00	Periphery expansion cable CC 03	for up to 4 expansion modules EM 123 or Sytem 200V modules, 0.5 m	
950-0KB50	PC/AG programming cable	MPI cable with PU-/Diagnostic port, 2.5 m; use as PC/AG or TP/AG
