CONFIGURATION

The **ATT1** configuration can be done with two different tools:

- An Android smartphone equipped with NFC and ATNFC APP or
- A "Windows" PC equipped with an RF programmer (AFC1) and ATNFC-Soft program.

Both programs can be downloaded (free of charge) from the download area of our website: www.ascontecnologic.com

Using these tools it will be possible to configure: sensor type, retransmitted range setting and burn out indication, and can also be used to see the current measured value and to print all data (configuration).

In addition, by ATNFC-Soft, the user will be able to freely prepare and download his own custom linearization.
